Introduction

When I began teaching in the Dark Ages, teaching standards were a dusty book on the shelf in the principal's office. Few teachers knew they existed, and no one used them. At this time textbook companies determined what was taught and how the skills were taught. I decided to start creating book units because I simply wanted to teach my way.

As you well know, teaching standards are now the most important resource teachers have. The standards have been updated and revised repeatedly to become a valuable tool. Each time the standards were revised, I revised the book units to reflect the changes. I am currently updating the units once again to incorporate the Common Core Standards.

With each revision of the teaching standards, I only updated the books I was currently teaching. Because some books were moved to different grade levels by our school system and I dropped other books to make room for new, some of my book units were not revised and remain very basic. This is one of those units. I hope you will be able to use this as a supplemental resource.
